OFFSHORE WIND FARM PASSAGE HOLLANDSE KUST (ZUID)

Access to the passage through wind farm Hollandse Kust (zuid) is only allowed for vessels not exceeding $46 \mathrm{m}$ in length.

For restrictions, see www.noordzeeloket.nl

HISTORIC WRECKS

The sites of historic wrecks are protected from unauthorised interference.

WINDFARM BORSSELE PASS (ATBA)

In view of the limited width of the area "Windfarm Borssele Pass", the following ships are recommended to avoid the area:

- a. ships exceeding 45m in length; and
- b. ships carrying dangerous goods.

Ships engaged in the construction and maintenance of wind turbines and their associated electrical infrastructure are permitted in this area.

OFFSHORE WIND FARMS UNDER CONSTRUCTION

The Netherlands: Turbines and substations are being installed and may display temporary aids to navigation. Submarine cables, underwater and seabed obstructions may exist throughout the area.

United Kingdom: A safety zone of 500m becomes operational around the turbines under construction. Consult local notices to mariners issued by the wind farm developer for details of installation progress.

OIL AND GAS FIELDS

Production platforms and associated structures, including tanker moorings, storage tankers and platforms on pipelines, generally exhibit Mo(U) lights, aircraft obstruction lights, and audible fog signals. Unauthorized navigation is prohibited within 500 metres of all such structures, including storage tankers which can swing around their moorings. Tankers manoeuvring in the vicinity of platforms and moorings should be given a wide berth. For further information see the Netherlands Coast Pilot (HP1) or the Mariner's Handbook.

SANDWAVE AREAS

Sandwaves exist in the areas indicated; depths may be less than charted.
