DEPTHS AND AIDS TO NAVIGATION

Depths in the main channel are maintained by dredging to 14.5m - LAT.
The secondary channels and depths shown on this chart are subject to frequent change.
The buoyage and other aids to navigation are adjusted accordingly.
For the latest information see Notices to Mariners or consult the pilotage authorities.

DREDGING OPERATIONS

Dredging operations will be taking place throughout the Westerschelde. The dredged material will be deposited on or near the edges of drying areas. A pontoon will be anchored in these areas and will be moved as necessary. Its mooring ground tackle will be marked by yellow buoys. Contact VTS Scheldemond for further details.
